Throughput elasticity: empirical differences vs analytic prediction
Phase: prove; logspace and large calibration designs
(a) logspace: elasticity
(b) large: elasticity
(c) logspace: prediction error
(d) large: prediction error
$\gamma_{\Lambda,\rho}$
Elasticity error: predicted - observed
Batch size N [tx]
rapidsnark
snarkjs
Observed
Affine (power term = 0)
Calibration size
Held-out size
Largest calibration size
